

KEN CLEMONS

Sales Portfolio | Enterprise Account Executive

United States | 314-496-7341 | ken.clemons@gmail.com | linkedin.com/in/kennethclemons

WHERE MY BACKGROUND MEETS THIS CATEGORY

- Data governance and permissions. Two years at Couchbase with the data officer, engineering managers and architects who owned the pipelines. Governance, replication across cloud regions, schema evolution and access control were the subject of nearly every meeting.
- Marketing data and measurement. Four years carrying Experience Manager and Analytics to digital and web marketing leadership at Adobe. Site content, traffic reporting, organic search performance and audience measurement, which is where collection practices are decided in the real world.
- Policy enforcement across devices and browsers. Two years at Cloudflare selling identity based access and policy applied to users, devices and applications.
- Regulated buyers. Centene, Anthem, Express Scripts, Ascension, Mercy, BJC and SSM Health on the healthcare side. Mastercard, Edward Jones, Arvest Bank and Alliant Credit Union on the financial side. Vendor risk questionnaires, security assessments and legal review are ordinary parts of my cycle.
- AI permissions today. At Analyst1 the recurring objection is not model quality. It is what the system may reach, how that was authorized and what an auditor can reconstruct later.

PIPELINE GENERATION

Every territory I have carried arrived empty, and no employer has handed me enough inbound to cover a number.

- Cloudflare. \$4M of funnel built across 35 named accounts with nothing inbound, closing at 115 percent of a \$1M number.
- Analyst1. Thirteen states, no list, five net-new logos in the first year.
- Couchbase. Joined pre-IPO with nothing written down and grew regional pipeline 45 percent to roughly \$4M.
- Method. Rank a named list on observable signal, lead outbound with a specific idea about that company, and work partner sourced and inbound opportunities with the same qualification bar as my own.

VALUE FRAMING AND DOING THE MATH

Start with their numbers. The business case gets built alongside the finance owner using their own loaded cost figures. Hours returned, headcount avoided, cycle time compressed, renewals retired, risk closed.

Agree on the metric first. Discovery walks the current process step by step. Who touches it, what it costs when it fails, and how anyone finds out. Whatever number we settle on in that conversation is the number the business case uses and the one we check after go live.

Proof it survives. Centene put a \$5M annual agreement through a finance review that questioned every assumption in it, and the case held. Couchbase cleared multi-year terms the same way with a VP of Finance.

Tell it as a story. The functional owner needs the workflow fixed. The executive needs a sentence they can repeat to the board. I write both before the meeting.

SALES EXECUTION AND MEDDPIC

MEDDPIC has run my deals since I was certified in it. Every element stays current in CRM, from metrics and economic buyer through decision criteria, decision process, paper process, pain, champion and competition, and I apply it honestly on opportunities it tells me to walk away from.

- Salesforce and Clari discipline carried from Gigamon and Cloudflare. At Gigamon I held \$5M of qualified pipeline clean against a \$750K target with weekly stage conversion and coverage review.
- Security review, third party risk, procurement and legal all get opened in month one and run side by side.
- I run my own demonstrations and bring a sales engineer when the question needs real depth.
- Before I ever carried a quota I worked in corporate procurement, so I know how a vendor package gets scored and which terms draw a redline.

WORKING ACROSS FUNCTIONS

- Marketing and product. Seven years selling to marketing owners at Adobe and Alfresco, and a standing habit of returning field patterns, competitive detail and feature gaps to product in writing.
- Legal and risk. Negotiated redlines alongside client legal teams on every large agreement, including regulated healthcare and financial services buyers.

- Finance. Business cases built alongside CFOs and VPs of Finance, using their spreadsheet and their assumptions.
- Internal teams. Eight person pursuit team at Red Hat, matrixed pods at Couchbase, Cloudflare and Gigamon, sales engineering and services coordinated through evaluation and deployment.

ATTAINMENT RECORD

- Red Hat. Three straight years over plan at 160, 128 and 137 percent on numbers of \$7M, \$5M and \$3.5M.
- Alfresco. 146 percent of a \$4M team target with \$1.5M carried personally.
- Couchbase. 135 percent of quota, all of it net-new.
- Gigamon. 125 percent of a \$750K regional number.
- Cloudflare. 115 percent of \$1M, every dollar of funnel built by me.
- President's Club at three employers across sixteen years.

EDUCATION AND CREDENTIALS

University of Arkansas, Sam M. Walton College of Business. MBA and BSBA. AWS Certified AI Practitioner. Twelve formal sales methodology programs including MEDDPICC and Challenger.
